Eduardo Fernández

Senior Backend Engineer | Tech Lead

Toluca, México | +52 722 582 3798 | isw_efm@icloud.com | github.com/iluscode | isw-eduardo-fernandez.vercel.app

PROFESSIONAL SUMMARY

Software Engineer with 6+ years of experience designing and building scalable APIs and backend services with Java, Kotlin, Spring, and MuleSoft. Technical liaison between Architecture and Backend teams, with Tech Lead experience coordinating development teams, translating business requirements into technical solutions, and delivering on schedule. Focused on code quality, production support, and continuous service improvement in Kubernetes, OpenShift, AWS, and CI/CD environments. Over the past year, integrated AI tools (Claude, GitHub Copilot) into the development workflow to speed up delivery.

EXPERIENCE

Senior Backend Engineer — Hitss Solution

August 2022 – Present

- Technical liaison between the Architecture team and Backend teams, aligning design decisions with implementation.
- Requirements analysis to translate business needs into technical solutions.
- Designed 10+ APIs for communication across architecture layers, with contracts in OAS (OpenAPI) and RAML, forming the backbone of the last 2 projects delivered.
- Authored ATDs (technical design documents) covering business logic specifications, diagrams, and API design.
- Developed 10+ APIs with Java, Kotlin, and MuleSoft for those projects, including unit tests and configuration management.
- Monitored logs in development and production environments, tracked and resolved customer-impacting production incidents, and drove continuous service improvement.

Backend Developer & Tech Lead — GFT

January 2020 – August 2022

- Developed APIs with Java and the Spring Framework.
- Led and coordinated the development team to meet project goals and delivery deadlines.
- Performed requirements analysis and designed technical solutions aligned with business needs.

TECHNICAL SKILLS

Languages: Java, Kotlin, Python, Go

Frameworks & Integration: Spring, MuleSoft, Flask, FastAPI

Messaging: RabbitMQ, IBM MQ

Databases: Oracle, MySQL, MongoDB, Redis, Firebase

Cloud & DevOps: AWS, Kubernetes, OpenShift, Jenkins, Git, Maven, Gradle, Nexus

Quality & Monitoring: JUnit, Selenium, SonarQube, Veracode, Splunk

AI-Assisted Development: Claude, GitHub Copilot, client in-house AI platforms

Methodologies: Scrum

EDUCATION

B.S. in Software Engineering — UAEMex, Tianguistenco Professional Academic Unit
2015 – 2020
